SUMMARY

Accomplished Lead Salesforce Engineer with 7 years of enterprise delivery experience across major CRM programmes at NAB and Appirio/Wipro. Proven track record owning end-to-end platform delivery — from solution architecture, stakeholder sign-off, and security review through to go-live and post-deployment support. Holds the Salesforce Certified Application Architect credential plus 7 additional Salesforce certifications spanning data architecture, security, analytics, Agentforce, and platform development. Deep expertise in CI/CD, APRA-regulated delivery, AI tooling adoption, and cross-functional technical leadership.

WORK EXPERIENCE

National Australia Bank

Lead Engineer — **October, 2024 – Present**

Lead Engineer for the Salesforce engineering squad within NAB's enterprise CRM program spanning Personal/Retail , Corporate, and Business Banking

- **Provided technical direction and design governance to senior developers** on feature delivery, platform architecture, and clean/reusable code standards
- **Led pull request reviews and technical design alignment forums;** accountable for technical quality and sprint velocity across the onshore-offshore delivery model. Up-skilled senior engineers on PR reviews and peer reviews to improve velocity on delivery without lowering quality of code.
- **Acted as technical SME for monthly production deployments,** providing rapid resolution of post-deployment issues and maintaining platform stability across release cycles
- **Championed AI-assisted development:** ran Cursor POCs, built adoption guidelines (including legal considerations), and presented estimated productivity gains to executives and the wider engineering team. Ran prompt engineering workshops across full SDLC including solution architecture, software development, testing, documentation etc.
- **Replaced Conga mail merge** (AppExchange) with a CCOM-based solution within one month on an unfamiliar legacy Salesforce instance — **driven by third-party security vulnerabilities.**
- **Led migration of ~20% of Corporate & Institutional Banking users** from Salesforce Classic to the enterprise CRM platform
- **Overhauled CI/CD pipeline saving 10–30 minutes** per developer setup; refactored trigger handler architecture achieving a 400% improvement in record processing speed

Senior Analyst Engineer — **May, 2022 – October 2024**

Key contributor to NAB's Salesforce expansion from 3,000 to 13,000 live bankers across Personal Banking and Corporate & Institutional Banking.

- **Acted as defacto solution architect for the Customer Conversation Framewor**k — designed the FSC Interactions-based solution, presented to the Security Architect Review Board and business/delivery stakeholders to obtain implementation approval; scaled across all Personal, Business, and Corporate Banking divisions in compliance with APRA requirements
- **Led the Salesforce side of NAB Personal Banking's Siebel-to-Salesforce migration** — data migration, lead management, and a multi-API service connecting Salesforce to originating legacy systems
- **Resolved a major production outage on the appointment booking system** — diagnosed a Salesforce backend Outlook calendar batch syncing bottleneck and implemented a targeted fix that restored service ahead of the automated cycle

- **Architect-ed a high-performance multi-page LWC framework** standardize component patterns across multiple user personas for 13,000+ bankers
- **Resolved high-severity production incidents involving Salesforce and Microsoft** SaaS products, providing technical guidance across vendor teams
- **Reduce complex Salesforce trigger handler methods** by introducing a record processing function, and guidelines on adding new logic to ensure single flow of record logic, and **reduce record processing speed by 400%**

Technical Product Owner / Analyst Engineer — April, 2021– April, 2023

Maintained platform stability and reliability as Technical Product Owner and Salesforce/DevOps Engineer within the BAU team, prioritising work items to balance delivery velocity with platform safety.

- **Scoped and delivered BAU Salesforce enhancements** in collaboration with Product Managers, CRM Consultants, Business Managers and end users.
- **Work with Engineering Managers** on monthly releases scoping and planning.
- **In-charge of sprint planning** for upcoming Salesforce related enhancement and fix work.
- **Maintained CI/CD infrastructure** (AWS, Jenkins, Docker, GitHub); improved resilience of batch jobs with enhanced retry, logging, and alerting
- **Triaged and resolved a complex multi-system customer data sync issue** across NAB's data pipeline (on-prem → Kafka → Oracle → Salesforce via AWS Lambda), coordinating a production data fix across multiple teams

Appirio/Wipro

Graduate Program — September, 2019 – April, 2021

Resolution Life

- Part of Resolution Life (formerly AMP Life) divest project to extract all functionalities from their salesforce instance into a new salesforce instance. Migrated approximately 40+ aura components within a short amount of time.
- Designed application log framework to log all errors occurred by using java singleton pattern framework to avoid heap size/limit issues.
- Provide insights on security model building to solution architects and business analysts.

Telstra

- Investigated technical limits and challenges using salesforce flows for technical architect and provided detailed analysis on what should be the recommended solution.
- Maintained and introduced new call center flows (new type of customer service request) on Telstra's existing complex multi flow architecture.

AMP Capital

- Lead pre-sales graduate team (team of 5) to create a POC within for AMP Capital's property management calendar app (embedded in salesforce homepages) and present to solutions architect. Part of the demo, I've challenge the UX design provided by explaining salesforce best practices (using SLDS's design patterns and standard lwc components) and manage to provide a much cleaner solution compared to the demo that was delivered by a secondary team.

SKILLS & STACK

Platform Engineering (Salesforce)

Lightning Web Components | Apex | Flows | SOQL | Financial Services Cloud | CRM Analytics | Agentforce

Architecture & Leadership

Technical Design | Solution Architecture | Code Review | Mentoring | Stakeholder Management | Agile / Scrum

Software Engineering

JavaScript | TypeScript | REST APIs | System Integration | Microservices | Mini-apps | Express.js | BFFs | Performance Optimisation | HTML / CSS

Cloud & DevOps

AWS | Jenkins | Docker | GitHub Actions | CI/CD | Shell Scripting

EDUCATION

THE UNIVERSITY OF MELBOURNE

Master of Engineering (Electrical & Electronics Engineering)

- Majored in Electronics design, Power system analysis and Electrical Systems design.
- Final Year Project: Industry project with Digital Falcon on software development and hardware testing of a GPS tracking system for arial drone.

Bachelor of Science in Electrical Systems

- Major in Electrical Systems and Engineering.
- Minor in Finance and economics and computer science.

CERTIFICATES

Salesforce Certified Application Architect | Salesforce
Salesforce Certified Platform Data Architect | Salesforce
Salesforce Certified Platform Sharing and Visibility Architect | Salesforce
Salesforce Certified CRM Analytics and Einstein Discovery Consultant | Salesforce
Salesforce Certified Agentforce Specialist | Salesforce
Salesforce Certified Platform Developer | Salesforce
Salesforce Certified Platform App Builder | Salesforce
Salesforce Certified Admin | Salesforce
Black Belt (Javascript) | Codility
